| Planned Project Activities | <p>The Project will mainly involve the repurposing of existing buildings into public rental housing, elderly homes, and student residencies for an estimated number of 3 060 beneficiaries, and with a total estimated built area of 56 266 m², reconstructed to high standards of energy efficiency. The Feasibility Study established an indicative list of Sub-projects, containing 32 Sub-projects distributed in 21 localities throughout the country; a reserve list of Sub-projects is available for substituting any Sub-projects unable to proceed.</p> <p>The creditworthiness of local public authorities (LPA) and other relevant public entities (PE) is verified by the Ministry of Finance (MoF) before signing an On-lending Agreement with the participating LPAs/PEs. A Cooperation Agreement is signed between the participating LPAs/PEs and the Ministry of Infrastructure and Regional Development MIRD/PIU, where the Sub-projects are defined and the LPAs entrust the management of works to the PIU.</p> <p>The LPAs/PEs develop the design of their Sub-projects, the PIU contracts the works and ensures the works supervision on behalf of LPAs/PEs. The CEB disburses its loan and the investment grants to the relevant project account in tranches; the PIU administers the project accounts and processes the payments to the contractors.</p> <p>After completion of works and hand-over of the facilities to the LPAs/PEs, they establish commissions that allocate the housing units, student residencies and elderly homes according to the relevant national legislation.</p> <p>The Grant shall exclusively finance energy efficiency measures in a number of Sub-projects under the Project.</p> |

In addition, the PIU will contract dedicated Local Managers to support the LPAs/PEs.</p> |
| Completion Date | 30 June 2029 |
| Completion Report Date | 30 September 2029 |
| End Date | 31 December 2029 |
| Estimated Cost Breakdown and Financing Plan of the Project | <p>The total Project costs are estimated at EUR 34.22 million, of which, the E5P investment grant of up to EUR 6 million will finance energy efficiency measures.</p> <p>As energy efficiency measures are expected to represent around 20% of each Sub-project costs, each Sub-project will be imparted an equal share of grant element as a proportion of its total costs (around 20%) provided that the Sub-project includes energy efficiency measures verifiably amounting to this share of total costs. The grant element will be financed from either the GSIF or the E5P grant. Subject to the CEB prior approval, the grant sources could be blended where needed to reach the necessary grant element share per Sub-project.</p> |
| Grant Eligible Costs | <p>Energy efficiency and renewable energy production investment costs under the Project as follows:</p> <ul style="list-style-type: none"> • thermal insulation of the building envelope including all external parts of the building (roof, walls, windows); • automatic temperature regulators in rooms, including day/night mode, and installation of thermal energy meters in each home; • replacement of incandescent light bulbs with energy efficient bulbs; • solar installations for the production of domestic hot water; • photovoltaic installations connected to the grid for the production of electricity; • low, medium and high capacity heat pumps, • other such measures to be defined in the design of the Grant-financed Sub-projects. |

| | |
|-------------------------------|--|
| <p>Expected impact</p> | <p>Grant-financed investments are expected to:</p> <ul style="list-style-type: none"> • Improve energy efficiency of the selected buildings; • Reduce CO2 emissions; • Enable optimal operation and increase the comfort and air quality levels in the selected buildings; • Improve building quality and extend building lifetime; • Reduce the household energy burden on the long term; • Increase awareness of the benefits of energy efficiency projects for the general public, construction sector staff, as well as local media; • Renewable energy production for own consumption. <p>It is estimated that the project will lead to reduction of 6 200 tonnes/ year of CO2 emissions, thus contributing to a cleaner environment and reduction of the climate change impact. The project is expected to provide relief to the end-beneficiaries' households budgets and those of participating LPAs, by reducing the electricity and heating costs through the savings of 17 300 MWh/year of heat energy and 5 800 MWh/year of electricity savings; thus, cost savings for electrical and heat energy savings are estimated at EUR 4.4 million/ year (or around EUR 132 million during a renewed 30-year life cycle of rehabilitated buildings). It is expected that the project will contribute to reducing inequalities by helping annually around 3 060 low-income and vulnerable persons, elderly and students access decent housing and by improving their living conditions. Access to upper secondary education would be facilitated annually to over 730 high-school students that do not have upper secondary level schools in their localities and will benefit of places in student residences.</p> |
